

Enterprise Procurement System (EPS) — Defect Tracker

SI No	Submitted By	Submitted Date	Description	Detected Sprint	Assigned To	Type Of Defect	Action Taken	Action Taken Date	Status (Open/Closed)	Remarks
1	Praveen Birla	15-Jul-2026	The database schema initially did not include a Request History table.	Milestone 1	Database Team	Logical	Updated the ER diagram and DBML schema to include a Request History table.	15-Jul-2026	Closed	Resolved after design review.
2	Sathya Sri	15-Jul-2026	The workflow diagram did not include the Procurement Officer role after Finance approval.	Milestone 1	Documentation Team	Standards	Updated the workflow diagram to include Procurement Officer, Supplier and Warehouse stages.	15-Jul-2026	Closed	Documentation corrected.
3	Praveen Birla	15-Jul-2026	The API specification did not define a rejection-reason field for purchase request approvals.	Milestone 1	Backend Team	Maintainability	Added a rejection-reason field and updated the Request History documentation.		Open	Implementation planned for Milestone 2.
4	Praveen Birla	15-Jul-2026	The technology stack document was missing Spring Mail configuration details.	Milestone 1	Documentation Team	Logical	Updated the technology stack section with the email notification component.	15-Jul-2026	Closed	Reviewed by team.
5	Sathya Sri	09-Jul-2026	After adding the department field to the User entity, registration failed because each user requires a department to be assigned.	Milestone 1	Backend Team	Logical	Updated the local database department table with predefined reference values.	09-Jul-2026	Closed	Verified after implementation.
6	Sathya Sri	15-Jul-2026	The registration API returned a plain String response instead of the standard ApiResponse wrapper.	Milestone 1	Backend Team	Logical	Updated the response type to use ResponseDTO for registration, returning a proper structured response.	15-Jul-2026	Closed	Resolved and verified using Postman.
7	Imdad	10-Jul-2026	Supplier documents were not verified before approval.	Milestone 1	Imdad	Logical	Implemented verification logic for GST, PAN and License documents before supplier approval.	12-Jul-2026	Closed	Document verification completed and verified through testing.
8	Navya	10-Jul-2026	Approved suppliers were not displayed correctly, and searching by city returned incorrect results.	Milestone 1	Navya	Logical	Fixed the approval logic to display only approved suppliers and corrected the city search functionality.	12-Jul-2026	Closed	Tested and verified with different supplier records.
9	Deepika	10-Jul-2026	Main menu navigation did not open the correct module, and the application crashed on invalid menu input.	Milestone 1	Deepika	Logical	Fixed menu navigation, integrated all modules, and added input validation with exception handling for invalid selections.	12-Jul-2026	Closed	All modules integrated and tested; invalid input now handled without errors.
10	Praveen Birla	15-Jul-2026	The storage location for the refresh token was not defined.	Milestone 2	Backend Team	Logical	Generated the refresh token and stored it in local storage.	20-Jul-2026	Closed	Resolved by defining a storage approach.
11	Praveen Birla	22-Jul-2026	Unclear handling of a product already referenced in a requisition when the Admin updates that product.	Milestone 2	Backend Team	Logical	Product details already referenced in a requisition are left unchanged when the Admin updates the product.	23-Jul-2026	Closed	Can use cascading rules for other forms of updates.
12	Sathya Sri	22-Jul-2026	No duplicate-checking mechanism existed for purchase requisitions.	Milestone 2	Backend Team	Logical	Added duplicate detection logic to flag requisitions on submission so the Manager can review them.	23-Jul-2026	Closed	Added a flag in the frontend to notify the Manager.
13	Praveen Birla	23-Jul-2026	Unclear workflow for handling requisition status when an Employee updates an already-submitted requisition.	Milestone 2	Backend Team	Logical	Updated status transitions per role and set the purchase order status to CANCELLED where applicable.	46227	Closed	Workflow confirmed with the team.
14	Varnika Devi	16-Jul-2026	The system accepted empty fields or invalid supplier details during registration.	Milestone 2	Varnika Devi	Logical	Added input validation using @NotBlank on supplier registration fields.	16-Jul-2026	Closed	Supplier registration validation implemented successfully.
15	Varnika Devi	17-Jul-2026	Duplicate GST numbers were allowed during supplier registration.	Milestone 2	Varnika Devi	Logical	Added GST uniqueness validation in the service layer.	17-Jul-2026	Closed	Duplicate GST validation implemented successfully and verified.
16	Varnika Devi	18-Jul-2026	Expired supplier compliance documents were accepted by the system.	Milestone 2	Varnika Devi	Logical	Added an expiry-date validation check for compliance documents.	18-Jul-2026	Closed	Expired compliance documents are now rejected.
17	Varnika Devi	19-Jul-2026	Duplicate approval levels could be created for the same department.	Milestone 2	Varnika Devi	Logical	Added duplicate approval-level validation.	19-Jul-2026	Closed	Approval hierarchy is now maintained correctly.
18	Varnika Devi	24-Jul-2026	A supplier performance rating greater than 5 was accepted by the system.	Milestone 2	Varnika Devi	Logical	Added rating range validation (0-5).	24-Jul-2026	Closed	Supplier ratings are now validated successfully.
19	Varnika Devi	25-Jul-2026	A performance record could be created for a supplier that did not exist.	Milestone 2	Varnika Devi	Logical	Added supplier-existence validation before creating a performance record.	26-Jul-2026	Closed	Supplier existence is now verified before performance record creation.
20	Imdad	17-Jul-2026	An Employee was able to approve their own purchase requisition.	Milestone 2	Imdad	Logical	Added validation to compare the requester and approver IDs.	18-Jul-2026	Closed	Self-approval is now restricted.
21	Imdad	19-Jul-2026	A Procurement Officer could approve a requisition before Manager approval.	Milestone 2	Imdad	Logical	Enforced the correct approval hierarchy.	21-Jul-2026	Closed	Correct approval sequence is now followed.
22	Praveen Birla	28-Jul-2026	No mechanism existed to track the status history of a Purchase Order.	Milestone 3	Backend Team	Logical	Created a Purchase Order History table to track status changes.	29-Jul-2026	Closed	Closed after verification.
23	Sathya Sri	28-Jul-2026	No process existed for handling goods received with defects or in a quantity less than expected.	Milestone 3	Backend Team	Logical	Added a separate entity for return, replacement, or quantity shortfall; notifies the supplier and updates the PO status to Inspection Failed.	29-Jul-2026	Closed	Resolved by adding ReceiveGoodsRequestDTO.
24	Sathya Sri	02-Aug-2026	The frontend does not flag a requisition as duplicate even when it is.	Milestone 3	Praveen Birla	User Interface	Planned fix: use the isDuplicate flag from the requisition table to mark it as duplicate in the UI.		Open	Pending implementation — planned for the next sprint.
25	Praveen Birla	02-Aug-2026	No mechanism existed to upload and store supplier files and documents.	Milestone 3	Praveen Birla	Logical	Used Cloudinary to upload, store and access files.	04-Aug-2026	Closed	Used the Cloudinary API service.
26	Sathya Sri	04-Aug-2026	Purchase order generation failed on the frontend.	Milestone 3	Sathya Sri	User Interface	Fixed by including the requisition's items when generating the purchase order.	03-Aug-2026	Closed	Items are now passed correctly in the frontend service.
27	Sathya Sri	04-Aug-2026	ModelMapper failed to map fields containing a List of items from another entity.	Milestone 3	Sathya Sri	Logical	Replaced ModelMapper with manual object construction using a builder pattern.	03-Aug-2026	Closed	Used a plain class object instead.
28	Praveen Birla	04-Aug-2026	No mechanism existed to send the purchase order to the supplier.	Milestone 3	Praveen Birla	Logical	Updated the purchase order status to PO_SENT upon sending it to the supplier.	05-Aug-2026	Closed	Resolved and verified.
29	Panja Abhishek	01-Aug-2026	The Supplier Profile section failed to render supplier details — SupplierProfileSection.jsx did not handle a null response when no supplier profile exists yet.	Milestone 3	Panja Abhishek	User Interface	Added null/undefined checks and an empty-state UI with a 'Create Profile' prompt in SupplierProfileSection.jsx when supplier data is unavailable.	02-Aug-2026	Closed	Added conditional rendering with a fallback empty-state component.
30	Panja Abhishek	02-Aug-2026	The Procurement Officer's ApprovedRequisitionSection did not show correct status badge colors — all statuses displayed the same default gray badge.	Milestone 3	Panja Abhishek	User Interface	Updated Badge.jsx to accept a variant prop and mapped each PO status (PENDING, APPROVED, SENT, DELIVERED) to a distinct color scheme in ApprovedRequisitionSection.	03-Aug-2026	Closed	Created reusable Badge variants for status visualization.
31	Panja Abhishek	03-Aug-2026	The Manager's RequisitionSection approval/rejection modal did not close after action and did not refresh the requisition list with the updated status.	Milestone 3	Panja Abhishek	Logical	Fixed the Modal.jsx onClose callback and added an API success handler to close the modal, show a toast notification, and re-fetch the requisition list after approve/reject.	04-Aug-2026	Closed	Used the Modal component with proper state cleanup on close.
32	Praveen Birla	05-Aug-2026	The purchase order history recorded the same value for both the old and new status.	Milestone 3	Praveen Birla	Logical	Fixed the save-history method that was incorrectly storing the same status for both old and new values.	10-Aug-2026	Closed	Closed after verification.
33	Sathya Sri	10-Aug-2026	No mechanism existed to restrict supplier selection to verified suppliers only.	Milestone 3	Praveen Birla	Logical	Updated supplier selection to list only verified and active suppliers.	12-Aug-2026	Closed	Closed after verification.

34	Imdad	03-Aug-2026	A purchase order could be created without an approved requisition.	Milestone 3	Imdad	Logical	Added validation to allow PO creation only for approved requisitions.	04-Aug-2026	Closed	Purchase order creation restricted to approved requisitions and tested successfully.
35	Imdad	03-Aug-2026	The same purchase order was generated multiple times for one request.	Milestone 3	Imdad	Logical	Added a duplicate PO check before saving.	04-Aug-2026	Closed	Duplicate purchase orders are prevented; unique PO generation verified.
36	Varnika Devi	04-Aug-2026	A supplier could accept a purchase order that had already been rejected.	Milestone 3	Varnika Devi	Logical	Added status validation before acceptance.	05-Aug-2026	Closed	Rejected purchase orders can no longer be accepted by suppliers.
37	Imdad	04-Aug-2026	Payment could be processed before goods were received.	Milestone 3	Imdad	Logical	Added GOODS_RECEIVED status verification in the Payment Service.	05-Aug-2026	Closed	Payment is now processed only after goods receipt confirmation.
38	Imdad	05-Aug-2026	The purchase order status field accepted invalid values.	Milestone 3	Imdad	Logical	Added a status whitelist validation (Packed, Shipped, Delivered).	06-Aug-2026	Closed	Invalid purchase order statuses are now blocked.
39	Varnika Devi	05-Aug-2026	Employee registration accepted duplicate email IDs.	Milestone 3	Varnika Devi	Logical	Added unique-email validation.	06-Aug-2026	Closed	Duplicate employee email IDs are now prevented.
40	Imdad	06-Aug-2026	An Employee record could be created without mandatory fields.	Milestone 3	Imdad	Logical	Added @NotBlank and @NotNull validations.	06-Aug-2026	Closed	Mandatory employee fields are now validated before record creation.
41	Imdad	06-Aug-2026	An Employee role could be entered with an invalid value.	Milestone 3	Imdad	Logical	Added role validation (Employee, Manager, Procurement Officer).	06-Aug-2026	Closed	Invalid employee roles are now rejected.
42	Varnika Devi	06-Aug-2026	Supplier registration allowed a weak password.	Milestone 3	Varnika Devi	Logical	Added password-strength validation.	06-Aug-2026	Closed	Weak passwords are now rejected.
43	Imdad	06-Aug-2026	An inactive supplier was displayed in the approved supplier list.	Milestone 3	Imdad	Logical	Filtered suppliers by ACTIVE status.	07-Aug-2026	Closed	Inactive suppliers are now excluded from approved listings.
44	Sathya Sri	14-Aug-2026	An internal server error occurred when the status parameter was sent from the frontend.	Milestone 4	Sathya Sri	Logical	Changed the controller parameter type to String and converted it to the enum during processing.	15-Aug-2026	Closed	Fixed the type mismatch error on the receiving end.
45	Sathya Sri	15-Aug-2026	Supplier performance rating was not being updated.	Milestone 4	Sathya Sri	Logical	Added a rating window after goods-received confirmation in procurement for each PO.	16-Aug-2026	Closed	Updated for each purchase order.
46	Sathya Sri	16-Aug-2026	Goods receipt was not available as a PDF for completed purchase orders.	Milestone 4	Sathya Sri	Logical	Added a 'View GR' button to view the goods receipt as a PDF, stored via Cloudinary with its URL saved in the purchase order table.	16-Aug-2026	Closed	Updated the backend to store the reference in the purchase order entity.
47	Sathya Sri	18-Aug-2026	The overall rating was not updated in the Supplier table, so the rating showed 0.	Milestone 4	Sathya Sri	Logical	Calculated the average of all ratings received and stored it in the supplier's rating field.	19-Aug-2026	Closed	Verified across multiple purchase orders.
48	Varnika Devi	15-Aug-2026	A user with an invalid role could access restricted features.	Milestone 4	Varnika Devi	Security	Added role-based access validation.	15-Aug-2026	Closed	Role-based access control was implemented successfully.
49	Varnika Devi	15-Aug-2026	An unauthorized user could access Admin endpoints.	Milestone 4	Varnika Devi	Security	Added authorization checks for Admin APIs.	15-Aug-2026	Closed	Unauthorized Admin access is now prevented.
50	Varnika Devi	15-Aug-2026	Audit logs were not recorded for important user actions.	Milestone 4	Varnika Devi	Logical	Implemented audit logging for critical operations.	16-Aug-2026	Closed	Audit logging implemented for critical user actions.
51	Varnika Devi	16-Aug-2026	Incorrect login attempts were not being recorded.	Milestone 4	Varnika Devi	Security	Added login-activity monitoring and logging.	16-Aug-2026	Closed	Login activities are now properly monitored and recorded.
52	Varnika Devi	16-Aug-2026	The REST API returned an incorrect response for invalid requests.	Milestone 4	Varnika Devi	API	Added request validation and proper error responses.	16-Aug-2026	Closed	API validation and error handling corrected successfully.
53	Varnika Devi	16-Aug-2026	API integration failed due to an incorrect request format.	Milestone 4	Varnika Devi	Integration	Corrected request mapping and API configuration.	17-Aug-2026	Closed	API request mapping corrected; integration works properly.
54	Varnika Devi	16-Aug-2026	The application failed during deployment due to configuration issues.	Milestone 4	Varnika Devi	Deployment	Corrected environment and application configuration.	17-Aug-2026	Closed	Deployment configuration issues resolved successfully.
55	Varnika Devi	16-Aug-2026	Application response was slow for large data requests.	Milestone 4	Varnika Devi	Performance	Optimized database queries and API responses.	17-Aug-2026	Closed	Application performance improved through query optimization.
56	Varnika Devi	16-Aug-2026	Project documentation contained outdated API details.	Milestone 4	Varnika Devi	Documentation	Updated API endpoints, configuration, and usage details.	17-Aug-2026	Closed	Project documentation updated with the latest API details.
